Art Unit: 2153

1. Claims 1-9, 12-20, 22 and 25-28 are pending for examination. Claims 26-27 were withdrawn. Claims 10-11, 21, 23 and 24 were canceled.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 28 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Schreiber et al. [U.S. Patent No. 5,970,491].

4. Schreiber et al. disclose (e.g., see Figs. 1, 4A and 4C) the invention substantially as claimed. Taking claim 28 as an exemplary claim, the reference disclosed a data transmission network comprising a plurality of gateway (108), each said gateway having a number of associated clients (110), wherein each said gateway is capable of acting as a source of data itself (440 of Fig. 4C) and is capable of sourcing data from another said gateway (400 of Fig. 4A).

5. While Schreiber et al. disclose the use of remote connection of gateways in order to accept inbound and outbound information, Schreiber et al. does not explicitly detail that the information is a live data content. It would have been obvious to one of ordinary skill in the art to recognize that such specific information at the gateways would have been a matter of intends use of gateways.

6. Claims 1-9, 12-20, 22 and 25 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
